

R10 'Solo'

from Romahome

Our most compact vehicle yet at just 12' 7", the R10 'Solo' has a rear travel seat enabling three people to travel. Although only one can sleep inside, the cleverly designed awning sleeps two more, giving the versatility so many Romahome customers want.

At under 4m the R10 is our first Romahome offered with either a five speed manual or an automatic gearbox option (sensodrive). Choose from two incredibly economical engines - the 1.4i or 1.4Hdi, both with very low emissions. Standing headroom is gained with our new lightweight easily raised roof.

Surely, this is the vehicle for today's energy efficient generation. Ideal as everyday transport, easy to park and very economical to drive yet still big enough to use as an overnight, weekend and holiday home.

There is no shortage of independent power options on board. The R10 has 12V sockets front and rear with 240V and secondary battery plus solar roof panels as an option for back up lighting.

A Camping Gaz bottle and portable water carrier are both sited internally under the galley kitchen. The double hob and optional blown air heating system runs off gas, while a Porta Pottie is cleverly hidden under rear seating.

Recessed LED reading lights in the rear have independent on/off switches and run off both battery and solar power. Plus there is still 240V hook up as with all of our vehicles.

Clever use of the rear seat back rest, table and passenger seat quickly converts to a 6'4" single bed in a few easy steps.

The optional portable 12ltr soft coolbag with 12V motor can be simply unplugged, taken and filled at the shops, then hooked back in on return to keep your items fresh and cool.

R10 'Solo'
